SCHEDULE

Approved Date - 06/11/2020

4 If ground works are proposed then, prior to commencement of the development hereby approved (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), the following components of a scheme to deal with the risks associated with contamination of the site shall each be submitted to and approved in writing by the Local Planning Authority:-

(1) A preliminary risk assessment which has identified:-

- all previous uses;
- potential contaminants associated with those uses;
- a conceptual model of the site indicating sources, pathways and receptors; and
- potentially unacceptable risks arising from contamination at the site.

(2) A site investigation scheme, based on (1) above to provide information for a detailed assessment of the risk to all receptors that may be affected, including those off site.

(3) The site investigation results and the detailed risk assessment (2) and, based on these, an options appraisal and remediation strategy giving full details of the remediation measures required and how they are to be undertaken.

(4) A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in (3) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Any changes to these components require the express consent of the Local Planning Authority.

The scheme shall be implemented as approved above and, prior to commencement of any construction work (or such other date or stage in development as may be agreed in writing with the Local Planning Authority), a Verification Report demonstrating completion of the works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to and approved in writing by the Local Planning Authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met. It shall also include any plan (a 'long-term monitoring and maintenance plan') for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action, as identified in the verification plan, and for the reporting of this to the Local Planning Authority.

Reason: *To prevent pollution of groundwater and in the interests of environmental protection and public health and safety, in compliance with the National Planning Policy Framework and policies 34 and 35 of the Adur Local Plan.*

The discharge of the condition is acceptable so long as raised planters are used with certified clean soil. Please ensure you send documentation to the Council to show that the soil in the planters is certified clean. Also, any excavated material should be removed from site immediately. If this is not possible it should be stored on an impermeable base and covered. WAC testing of all excavated soil should be undertaken and the Council should be sent the certificates as well as waste transfer notes for exported soil. Also, the advice in s. 7.6 concerning construction workers should be followed.

Plans Referred to in Consideration of this application

The application has been assessed and the decision is made on the basis of the following plans and documents submitted:

Reference/Drawing Number	Version	Date Rec
SUPPORTING STATEMENT LETTER	Dated 07.10.20	07.10.2020
PHASE 1 DESK STUDY	LP2337 DR_1-46	07.10.2020
PHASE 1 DESK STUDY	LP2337 DR_47-59	07.10.2020
PHASE 1 DESK STUDY	LP2337 DR_60-130	07.10.2020

Reason: *For the avoidance of doubt and in the interests of proper planning.*
