Dear Sirs,

Re: AWDM/0508/26

I wish to make a protest about the above planning application. As a resident in Church Street, Shoreham-by-Sea, I am a regular shopper at the High Street branch of the Co-op which has improved greatly after their refurbishment, BUT they have erected a monstrosity on the back of the property. This is not seen from the High Street or Church Street but can be plainly seen from Middle Street which has an open area from it and the road. This is a Conservation Area with several listed buildings and we, as citizens, have been very careful to abide by the rules!

However, I gather that the structure in question is much higher than that approved and its height takes the light from several of the gardens of the adjoining properties in the Conservation Area. I genuinely feel that the dominance of this structure should be reduced. I would add that the rubbish left in the area – presumably by the contractor – has been unsightly.

Yours sincerely,
