ear Mr Hone, In confirmation of our telephone conversation of today, we wish to register our presentation regarding the amendments to the original planning application for the above property.

1. The rooflights in the East and West roof slope - we would accept the size and position of the installed window, providing it is fixed closed and fitted with permanent obscured glass as per your original directive.

2. The mono pitched roof over rear single-storey extension - we strongly object to this as it would further decrease light to our ground floor study. Why can't this remain as a flat roof to echo the existing flat roof extension ?

As you are aware , the amendments do not appear on your website at present , but as we will be away until the 1st October, we wished to make your aware of our concerns now.
We would appreciate your confirmation of receipt. Thank you.

Yours sincerely

Neil Walker Richard Fox
