Evening,

EVIDENCE - Light pollution.

Please find attached photographs taken just before 8pm this evening.

The first photograph shows the floodlights that I can see from our ground floor living area, the one on the south side shines directly in to all three floors of our house. There is no barrier between us and that light. The lights further to the east is beginning to shine through the foliage as the bushes loose there leaves. The lights on the north side as also visible even through those lights are facing south.

The second photograph is taken 7 metres back into our ground floor room and as can be seen the floodlight shines that bright that when I put my hand there it produces a clear shadow.

I tolerate this, but the question that the applicant should ask is ‘is this reasonable and acceptable?’ to extend the hours beyond 8 pm during the week, 6 pm on Saturday and 4pm on Sunday.

Regards

David Osland
