I object to this development on the basis that it is an area already protected by the Green space plan and would be an overdevelopment of a natural Green space. I also believe that promoting the fact that there could be 150 cars parking there would cause chaos on a road that can already be dangerous for young children especially. Unless all current parking on the road is forbidden, children will run out between cars and that will be worse for children using the sea and potentially parked on this site
