Good Afternoon Jo,

Please see my comments below for the
above planning application. I am
unsure what you can put under a
permitted development so please let
me know
if I need to change anything/some
things can't be applied.

In support of this application a

Noise Assessment was submitted (Ref: J3616, dated 23/04/2023), the assessment highlighted the plant equipment on the eastern elevation of the property, as well as potential noise from the intended commercial unit below. There was no mention of the Rose and Crown which is the public house which is situated 17m away from the nearest point, and 35m away from the monitoring location. Could a justification behind this please be provided.

Should a satisfactory response be received please see my comments below:

-

Works of construction or demolition, including the use of plant and machinery, necessary for implementation of this consent shall be limited to the following times.

Monday - Friday 08:00 - 18:00 Hours

Saturday 09:00 - 13:00 Hours

Sundays and Bank Holidays no work permitted

Any temporary exception to these working hours shall be agreed in

**writing
by the Local Planning Authority at least five days in advance of works commencing. The contractor shall notify the local residents in writing at
least three days before any such works.**

Reason: To safeguard the residential amenity of the area

-

**The use hereby permitted shall include the sound insulation scheme,
recommended in Section 6 in the Noise Assessment (Ref:J3616) submitted,
for protecting the upper floor residential unit from noise. The scheme
shall achieve a minimum airborne sound insulation value of 50dB (DnTw + Ctr
dB). Following implementation of the insulation scheme, a test shall be
undertaken to demonstrate that the attenuation measures carried out has
achieved the minimum airborne sound insulation criteria. The use of the
development shall not commence until test results, demonstrating the
minimum sound insulation criteria has been achieved, has been submitted to
and approved by the local planning authority.**

-

No development shall take place, including any works of demolition,
until a Construction Management Plan has been submitted to and approved in
writing by the Local Planning Authority. Thereafter the approved Plan shall
be implemented and adhered to throughout the entire construction period.
The Plan shall provide details as appropriate, but not necessarily be
restricted to the following matters:

-

the anticipated number, frequency and types of vehicles used during
construction,
-

the method of access and routing of vehicles during construction,
-

HGV construction traffic routings shall be designed to minimise journey
distance through the Councils Air Quality Management Areas (AQMA's),
-

the parking of vehicles by site operatives and visitors,

- the loading and unloading of plant, materials and waste,
- the storage of plant and materials used in construction of the development,
- the erection and maintenance of security hoarding,
- a commitment to no burning on site,
- the provision of wheel washing facilities and other works required to mitigate the impact of construction upon the public highway (including the provision of temporary Traffic Regulation Orders),
- methods to control dust from the site,
- a commitment to following BS5228:Code of Practice for noise and vibration control on construction and open sites,
-

details of public and neighbour engagement both prior to and during construction works.

Reason: As this matter is fundamental in order to consider the potential impacts on the amenity of nearby occupiers during construction.

--
