To whom it may concern

I would like to object to the planning permission for a second story extension for the following reasons :

- The current single storey extension has already blocked light to our kitchen as our property is approx. 3ft lower than the extension as we have 3 steps up to our garden which is level with the current extension. Our house is set back further than number 14 before the single storey was built.
- If a second storey was to proceed then it will not only block our light to our kitchen but also number 16 as there is not a 2m distance to number 16 so there light would be completely blocked as their kitchen window is right next to the current extension.
- Our property is a disabled council house so our washing line is level with the current extension and as we both have mobility issues we cannot move our washing line further up the garden and a second storey extension will block sunlight to this area
- This second storey extension could also potentially block light into my daughters bedroom who suffers from anxiety and depression.
- This second storey building would be a complete eye sore from our property to the degree if this property was ever sold it would put people off buying our property and the property of number 10 which is privately owned especially as it does not contain the same brickwork as the main house, We are considering buying our council home at some stage as we have lived here for over 17 years but not if this was to proceed as it would be unsellable as the current extension is already unattractive, overbearing and detracts the character of these period properties.
- We will also have a loss of privacy to our garden unless frosted windows were installed.
- Number 14 have already blocked light not only by the single storey extension but removed 4ft hedge boundary and replaced by a 6ft fence the whole length of the boundary which completely blocked light from our north kitchen window and partially our east kitchen window as you can see from the image the current extension exceed the 6ft fence by approximately 3-4ft so double storey will completely block the little sunlight we currently have to our kitchen.

I would highly recommend a visit to view our complaints but I have inserted an image below that was taken from my back door
