Heritage Statement

Impact of the signage on the site

The impact of the new signage has been minimised by the colour of the backing panel to be white to blend in with whitewashed external walls. Also the maximum height of the letters is 11cm high, and soft pastel type colouring. The signs will not sit proud by more than 6mm.
The hanging sign, which is positioned above the doorway with its wrought iron bracket, hopes to give a retro look to the sign from past times, but at the same time giving it a fresh clean look and feel.
The fixing of both signs will be by standard screw & rawl plugs.
So the drilling & damage to the external walls will be kept to a minimum.
