AWDM/0995/18
1 - 2 Royal George Parade Upper Shoreham Road Shoreham-By-Sea West Sussex BN43 6TB

Having reviewed the documents submitted with the application I would like to raise the following issues which require clarification before making final comments on the proposals;

1. The specifications for the proposed plant give different noise levels to those used in the report by KR associates. Please clarify.

2. The plans show a Mitsubishi VRF AC unit. Is this proposed or existing? In either case there is no mention of this piece of plant in the report from KR Associates and it needs to be taken into account in any noise assessment.
