Subject: Planning Reference no. AWDM/1596/25
To: <planning@adur-worthing.gov.uk>

Good afternoon,

I have been informed that planning permission is being sought to erect a 5G mast at the Community Centre, Romany Road, Durrington.

I wish to object to the proposal of this ugly eyesore. It would dominate the landscape and ruin the community.

It would be very close to my home (which is directly opposite the Community Centre on the north side) and would be visible from all the facing windows of my house.

It would pose a real health risk to people with certain medical conditions and also to the elderly and children who go to school and nursery in this area.

There are case studies of real-life effect of 5G on human health and these show that there are high levels of radiation and that 5G deployment is a serious public safety issue.

Durrington is a very built up area and I really think this planning proposal is totally unacceptable.

Yours sincerely
