We write to object to the planning application AWDM/0737/26 at the junction of Amberley Drive and Marine Drive on the following grounds

Selling food and drinks will undoubtedly give rise to litter in the area
During the summer months the roads in that area are full of traffic and this will add to even more congestion

At various times, the greensward attracts travellers which the council is responsible for removing. The facilities that are planned will be more attractive to travellers with an increase in the problems that they generate.

The beach and greensward area is very attractive as it is and sought after by people from some distance away. Why do they need a sandpit, pony rides etc as well?

Over the past year, several lorries and containers have been stored on the site which has detracted from the unspoilt and natural appearance.

In the summer months, there is a plethora of wildlife in this area, skylarks and other birds that this development will discourage or eliminate

The Goring Gap beachside area has an enviable reputation as an open green unspoilt space. A development such as this will be a precedent for future commercial interests and the unique character of the area will be lost for ever.

Roger and Marilyn Nash
