Hello

I wish the following comments to be considered with respect to the planning application for Galleons Reach, The Street, Shoreham by Sea BN43 5NJ

1. LOSS OF LIGHT
I live at High Trees , The Street, to the west of Galleons Reach. The way my house is designed means we have windows for our lounge and kitchen on our east wall, the construction of the hip to gable extension and rear dormer would impact significantly on the light in our house.

2. LOSS OF PRIVACY
The proposal includes windows on the west side in the roof of the construction which would overlook our house and garden that is currently private and not at all overlooked. We have a low roof so this would significantly reduce our privacy. The balcony would also reduce our privacy.

3. OVERBEARING
The application looks overbearing for the size of the plot and appears to be an over development of a family home.

4. NOISE AND DISTURBANCE
We are all working at home, this is going to cause significant disruption and noise for a prolonged period of time that is going to be detrimental to our lives.

I would be grateful if the above can be considered.

Kind regards,

Lisa Arnott
