Hi Peter

I hope you are well.

We have discussed and reviewed the application reference number AWDM/0791/18. As the airport we object to this application.

Although the building currently has no direct access to airside, we believe that access could easily be gained. This building is ideally located for air side operations and it would have an adverse negative effect to the airport if it was to be used for non aviation activities. Furthermore, as per your email, we also have not seen any evidence of marketing for aviation activities.

The airport already has too many buildings next to the operational boundary that are not used for aviation activities, this deprives the airport of much needed operational income and as such we will object to any applications such as this one.

Please do not hesitate to contact us if you require any further information.

Kind regards

Jonathan Candelon / Director
