AWDM/0112/16

10 the Meadway

I have already sent an email with my objections to this application and as I had not heard anything I was having another look at the plans and I did not realise initially how large this property will be. Having looked at them again I am very concerned.
This property will be far too large for the road and impact seriously on the surrounding houses. It will block out light for several houses including mine.
As I understand it is going back just over 16 metres so there will be no garden left at the rear so the property backing on to no 10 will have literally no sun and people looking directly into their garden from the rooms at the back and from the balcony. They will have no privacy.
We will have little privacy at the front as the balcony looks into my daughters bedroom. As I have said before she needs to rest frequently and this will damage her well being.
Also, the floor plans don't seem to use the space efficiently. Bedroom 1 has a wc and wardrobe off to the left where there is a full height space. Most of this is not used. Why would you not want to use this space.It makes me wonder if this will be converted to another bedroom after completion?
It seems an over large house for 2 bedrooms.
There have been previous plans for large properties on the beach that take away light and privacy that have been refused as residents objected. I am hoping the same will happen here.
I want to reiterate my objection to these plans.
The property will dominate the road and noise levels will increase from the balconies. I understand some renovation is needed but can it be smaller and take more consideration of the neighbours.
Please register my strong objection to these plans.

Many thanks
Kind regards
Penny Bloor
