Hi
I have received details of proposed rooms in roof for 91 Hammy Way, Shoreham.
I am concerned with regards to the rear dormer windows, my property backs onto 91 Hammy way, and should the rear dormers be approved, the occupants will be able to have a direct view into my kitchen, lounge and rear garden, it will make the rear of my property completely overlooked and take away all of my privacy. I am opposed to this. Velux windows have been used by many properties in the area and are far less intrusive.
Kind regards
Mrs B Lewis
