Having received the Revised Proposal, I do not feel this resolves the problem in any way.

As mentioned before our main concern is the narrowing of the existing pavement - we do not think any amount of dropped curbs is the answer as both the existing pavements will be too narrow for said wheelchair & mobility scooters and prams with accompanying children.

We would also, as residents living in close proximity (Sussex Court) to said proposal, reiterate the fact that we would be most affected by the provision of a motorcycle bay for up to 5 motorcycles i.e. noise and pollution which I hope will be taken into consideration when a decision is made.
