9th June 2012.

James Appleton,
Planning, Community & Wellbeing
Adur & Worthing Councils.

Dear Sir,

Re Planning Ref. ADC/0191/08

In response to your notice of 1st June 2012, I wish to make the following observation:.

I am extremely concerned by the proposed development. In March 2004, the Elm Grove Estate was in correspondence with Bruce Reynolds, Senior Environmental Health Officer, (your ref. E/1344/03/BR), regarding the general and late night noise from this site. Fortunately this resulted in much improvement, however, even now, it is often necessary to keep doors and windows closed in order to hold a normal conversation or listen to

radio or T.V. The prospect of more noise by ever encroaching units is unthinkable. Work starts on this site at 06-30 am and often continues until nearly midnight if the company is working to maximum production. There are already outlet units on the Industrial Estate, are more really necessary? (especially during a recession!).

I hope this will receive sympathetic consideration.

Yours faithfully,

Burtenshaw

Ann L. BURTENSHAW.
