Dear Sirs

REF AWDM/1247/23

I am completely against any more work and updates of the building 76 - 78A. The site is already too high, and separate private entrances would be a problem, we all ~~are~~ local nearby house have been through hell with traffic problems shutting one side off a very busy road, we was told it would not be a problem. well most of the time a traffic jam all sitting outside our houses all pumping out fumes, it has given me and my wife coughs and bad throats, so we cant even get in our garden, we might have take on

Some advice. This builder seems
to do whatever he likes when he
likes. I have also noticed the 2
yew trees have suddenly after all
these years are dying or dead
which was saposed to be protected,
and the right of way is still blocked.
Perhaps this will look into.

Yours

Robert Jarred.
