Your ref: AWDM/0631/24

Date: 19 September 2024

Dear Planning team (FAO: Peter Barnett),

PROPOSED ONE BEDROOM FLAT AND FIVE BEDROOM HOUSE.

LAND SOUTH OF 35 TO 37 HIGH STREET, SHOREHAM-BY-SEA, WEST SUSSEX.

Thank you for consulting the Environment Agency on the above application following the submission of a revised Flood Risk Assessment.

We have reviewed the information as submitted and set out our position and comments below.

Environment Agency position

We are satisfied that our previous objection (as per our letter dated 28 June 2024) can be removed, provided that the following condition be attached to any planning permission granted, and that the details in relation to the condition be submitted and approved by the Local Planning Authority.

Condition – Flood risk

The development shall be carried out in accordance with the submitted flood risk assessment (ref: 94626-BPM-HighStreet, UNDA, August 2024) and the following mitigation measures it details:

- **All residential accommodation to be at 6.10 metres above Ordnance Datum (AOD).**
- **Finished floor levels shall be set no lower than 6.10 metres above Ordnance Datum (AOD).**

These mitigation measures shall be fully implemented prior to occupation and subsequently in accordance with the scheme's timing/phasing arrangements.

The measures detailed above shall be retained and maintained thereafter

throughout the lifetime of the development.

Reasons

To reduce the risk of flooding to the proposed development and future occupants**.**

Advice to the Local Planning Authority

Flood warning and emergency response

We do not normally comment on or approve the adequacy of flood emergency response procedures accompanying development proposals, as we do not carry out these roles during a flood. Our involvement with this development during an emergency will be limited to delivering flood warnings to occupants/users covered by our flood warning network. Planning practice guidance (PPG) states that, in determining whether a development is safe, the ability of residents and users to safely access and exit a building during a design flood and to evacuate before an extreme flood needs to be considered. One of the key considerations to ensure that any new development is safe is whether adequate flood warnings would be available to people using the development.

In all circumstances where warning and emergency response is fundamental to managing flood risk, we advise local planning authorities to formally consider the emergency planning and rescue implications of new development in making their decisions. As such, we recommend you refer to 'Flood risk emergency plans for new development' and undertake appropriate consultation with your emergency planners and the emergency services to determine whether the proposals are safe in accordance with paragraph 173 of the NPPF and the guiding principles of the PPG.

Advice to the Local Planning Authority & Applicant

Flood resistance and resilience

We strongly recommend the use of flood resistance and resilience measures. Physical barriers, raised electrical fittings and special construction materials are just some of the ways you can help reduce flood damage.

To find out which measures will be effective for this development, please contact your building control department. If you would like to find out more about reducing flood damage, please visit the Flood Risk and Coastal Change pages of the Planning Practice Guidance.

Further guidance on flood resistance and resilience measures can also be found in:
