Flag Status: Flagged

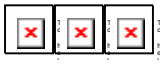

Thanks Peter
This should be fine, could we condition the hours of use for the floodlights so they can only be used between the hours of 18:30 - 22:00hrs on any day?

Dear Peter,

Thank you for your email.
I have contacted the suppliers and they have supplied the attached details to show the vertical illuminance. Also shown on the calculations is the Obtrusive Light Compliance Report, which shows a pass for the properties that could be affected.

If you need any more information please do ask.

Kind regards

Please could the applicant confirm the times when the lights will be in use?

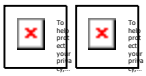

Due to the relative proximity of existing residential premises there is the potential for the new lights to cause a loss of amenity as a result of light spillage and glare. I would recommend the following condition:

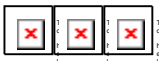

Prior to installation, details of the external lighting of the site shall be submitted to and approved in writing by the Local Planning Authority. These details shall include the predictions of both horizontal illuminance across the site and vertical illuminance affecting immediately adjacent receptors. The lighting installation shall comply with the recommendations of the Institution of Lighting Professionals (ILP) "Guidance Notes for the Reduction of Obtrusive Light" (2011).

While a condition is suggested I would prefer to have this information before a decision is made. Are you able to provide more details on light spillage and brightness at this stage, together with hours of illumination?

Thanks
