Stance: Customer made comments neither objecting to or supporting the Planning Application

Reasons for
comment: - Other

Comments: Will the planners check that:

1) As this is the same area the Worthing Heat Network is intended to route into the plant areas of Splash Point, will placing the containers here inhibit these works and the equipment required to be routed into the plant rooms below and behind.

2) Have there been checks with the structural engineers that the overall static mass of the two containers and loaded equipment and cladding materials to the containers, will not be problematic to the submerged concrete basement and plant room retaining walls of splash point as it looks like they will be sitting immediately above and near the outer edge of that part of the structure submerged below that walkway area.
