**Attachments:** Rena_Amendment.jpg

Hello Peter,

Apologies that I am not able to alter the initial application for an amendment to the plan, however I hope that you can accept this email and attached drawing. My suggestion is that the larger velux in the roof of Rena sits 4 inches (10.16cm) further down the roof than the other roof windows. This will in effect mean that the larger roof window is aligned centrally with the other roof windows rather than being aligned along the lower edge. To confirm, the new window that I am proposing is 78 wide and 118 high, so a little larger than the others but not a great deal.

The attached drawing (which I have created quite inexpertly in photoshop) shows the intended positions of the windows (outlined in red). I hope that this is all clear and you are able to accept this change to the application digitally. Do call if you have any questions, my number is 07818 038938. I look forward to hearing from you soon.

All the best,

Jack Walton
