Subject: Planning Application AWDM/0329/26 St Peters Church Furze Road

To: planning@adur-worthing.gov.uk <planning@adur-worthing.gov.uk>

Dear Planning Officer

Re: Planning Application AWDM/0329/26 St Peters Church Furze Road

I am writing to object to the above application for the installation of radio transmitting aerials on the building opposite my home.

My main concern is the visual impact of the proposal. The aerials and associated equipment would be clearly visible and would introduce a prominent and rather industrial feature into what is currently a relatively open outlook. From our property, this would sit directly in our line of sight and would noticeably change the character of the area.

I am also concerned about the effect on residential amenity. Having this type of equipment so close to our home would alter the feel of the area and have a negative impact on our day-to-day enjoyment of the property. The scale and positioning of the aerials appear quite dominant given their proximity to surrounding homes.

In addition, I would like to raise concerns regarding health and safety. While I understand there are guidelines in place, I would ask that the application clearly demonstrates compliance with all relevant standards and provides reassurance to nearby residents.

Given that our area is elevated and more exposed, I am also concerned about the potential risk associated with lightning strikes and whether the installation could increase the risk of fire or other hazards. I would ask that this is fully assessed and addressed as part of the application.

Overall, I do not feel the proposal has been designed in a way that sufficiently minimises its impact on neighbouring residents or the surrounding area. For these reasons, I would respectfully ask that the application is refused.

Yours faithfully,
Victoria Dorling
