Proposed Storage Shed
Adur Petanque Club
Lancing Leisure Centre
BN150PH

1. General

The club lease two terrains from ADC
One directly to the south east of the main entrance to the leisure centre and another located to the east of the nursery
Currently there is no storage facility for the Gazebo curtains, Rakes, Boule, playing circles and numerous tools required for maintaining the terrains, or strings, boules needed for matches etc

This application is for a small storage shed on the lower terrain, this would occupy less than 1.5% of the lower terrain area

2. Materials

The construction would be tongue and groove treated pine/redwood Apex design with quality roofing felt
Colour to match existing fencing to blend with surroundings

3. Location

The structure would be located within the paved area of the petanque terrain to provide easy access from the footpath

4. Access

No alteration to the existing vehicle or pedestrian access is proposed
