Your Ref: ADC/0419/10

Dear Mr. Morgan, 2 pairs of double garages
Land rear of 96 to 98 Cross Road Southwick.

The planning file details covering the current planning application ADC/0419/10 do not seem to indicate clearly what the planning application is for. In the first instance 2 pairs of double garages (of revised design) are indicated but it does not show where these new garages are to be erected. Two existing garages are shown but not titled as being existing. There are at the moment 8 single and 4 double garages on the land at the rear of 96 to 98 Cross Road, Southwick and I strongly object to any increase in that number of garages. The file also states that the planning application is for the storage of small building plant and materials (refused 22-6-04 and I would object to this change of use once again on the grounds of noise, disturbance, danger to users and loss of privacy in this residential area. The access drive to the site is partly owned by myself and I note from the planning file that Certificates A and B cannot be issued by the applicant. If and when more detail is forthcoming I would be pleased to see this information related to the Application.

I await your reply

Yours sincerely.
