Erection of self storage units at above.
I wish to oppose the above application. The land at the rear of the houses affected are a wildlife haven. We enjoy a wide variety of birds, foxes, bats, slow worms, there is also rumour of badgers and crested newts.
There are natural wells to the rear of our gardens, it would be very wrong to disturb this habitat, especially as we are all trying so very hard to protect our environment. Myself and my direct neighbours specifically plant shrubs and flowers to encourage bees and butterflies. We do in fact have the Sussex Blue butterfly, again a protected species.
I am extremely concerned that the noise and light pollution would have a harmful affect on our nature friendly environment. This is, at the end of the day a residential area.
My other concern is security. If opened at the rear of our gardens this could compromise our privacy.
I apologise for the lateness in my response, [redacted]
Please consider my opposition seriously, I feel very strongly that this proposition would have detrimental consequences.
Regards,
Jane Brind.
