Reasons for comment:	- Design - Other - Overdevelopment

Comments:	So, the original planning application has now been revised to show a retrospective request, along with the timelines. I'm no planning expert but even I knew the original was an incorrect planning application. I can foresee over the next months another application will be made, in order for these modular block to become permanent OR for building to take place where the supposed temporary structures currently are. The school site is no longer big enough for the number of pupils. More modular blocks will be coming, and more impact upon the local community. It looks like an industrial estate as it is now. Parking is already an issue due to the number of staff working at the school and now this so called "temporary measure" of modular classroom blocks is just a precursor to a longer term plan of adding structures to the school site.

Kind regards
