Comments Details

Commenter Type:	Member of the Public
Stance:	Customer made comments in support of the Planning Application
Reasons for comment:	
Comments:	I fully support this application. In terms of objections from WSCC Highways, I note that they have not actually done a site visit but instead done this using a desktop site visit via Google Mapping - which does not show the site as it is at current times. Google mapping is dated June 2024 - the site and access has changed since then. How can this be accurately used to create an objection! WSCC state that they struggle to see clear access - this has been updated and there is clear access to the site. I would suggest that WSCC Highways actually do an accurate site visit before making objections to a planning application and therefore their recommendations should be rejected until such a time.
