St. Nicolas Court, Shoreham-by-Sea

Brick Wall and Glazed Conservatory for Scheme Managers Office & Lounge

Design and Access Statement

Amount

It is proposed to provide a conservatory to the east elevation of block 18-20 St Nicolas Court. The extension will overlook existing communal gardens within the sheltered scheme. The floor space area is 23 sq. m. The building is accessible from the existing lounge with external patio doors to the garden area.

Layout

The conservatory extends out into the communal gardens from the existing community lounge at the sheltered scheme. This is the central location where all residents meet, and the most logical location for the scheme managers office and a lounge to enlarge the current lounge facilities. Access is easily obtained through well lit private communal garden paths.

The conservatory would be visible for all the residents from the rear of blocks 1-4, 5-8, 9-12, 14-17, and the front of blocks 21-24 and 25-28.

Scale

The single storey conservatory will be 6,500mm wide by 3,500mm deep. The eaves height of the roof will be 2,300mm, and 3,000mm at the ridge where it abuts the existing building. The existing external lamp and raised planter will be repositioned approximately 4,000mm to the east.

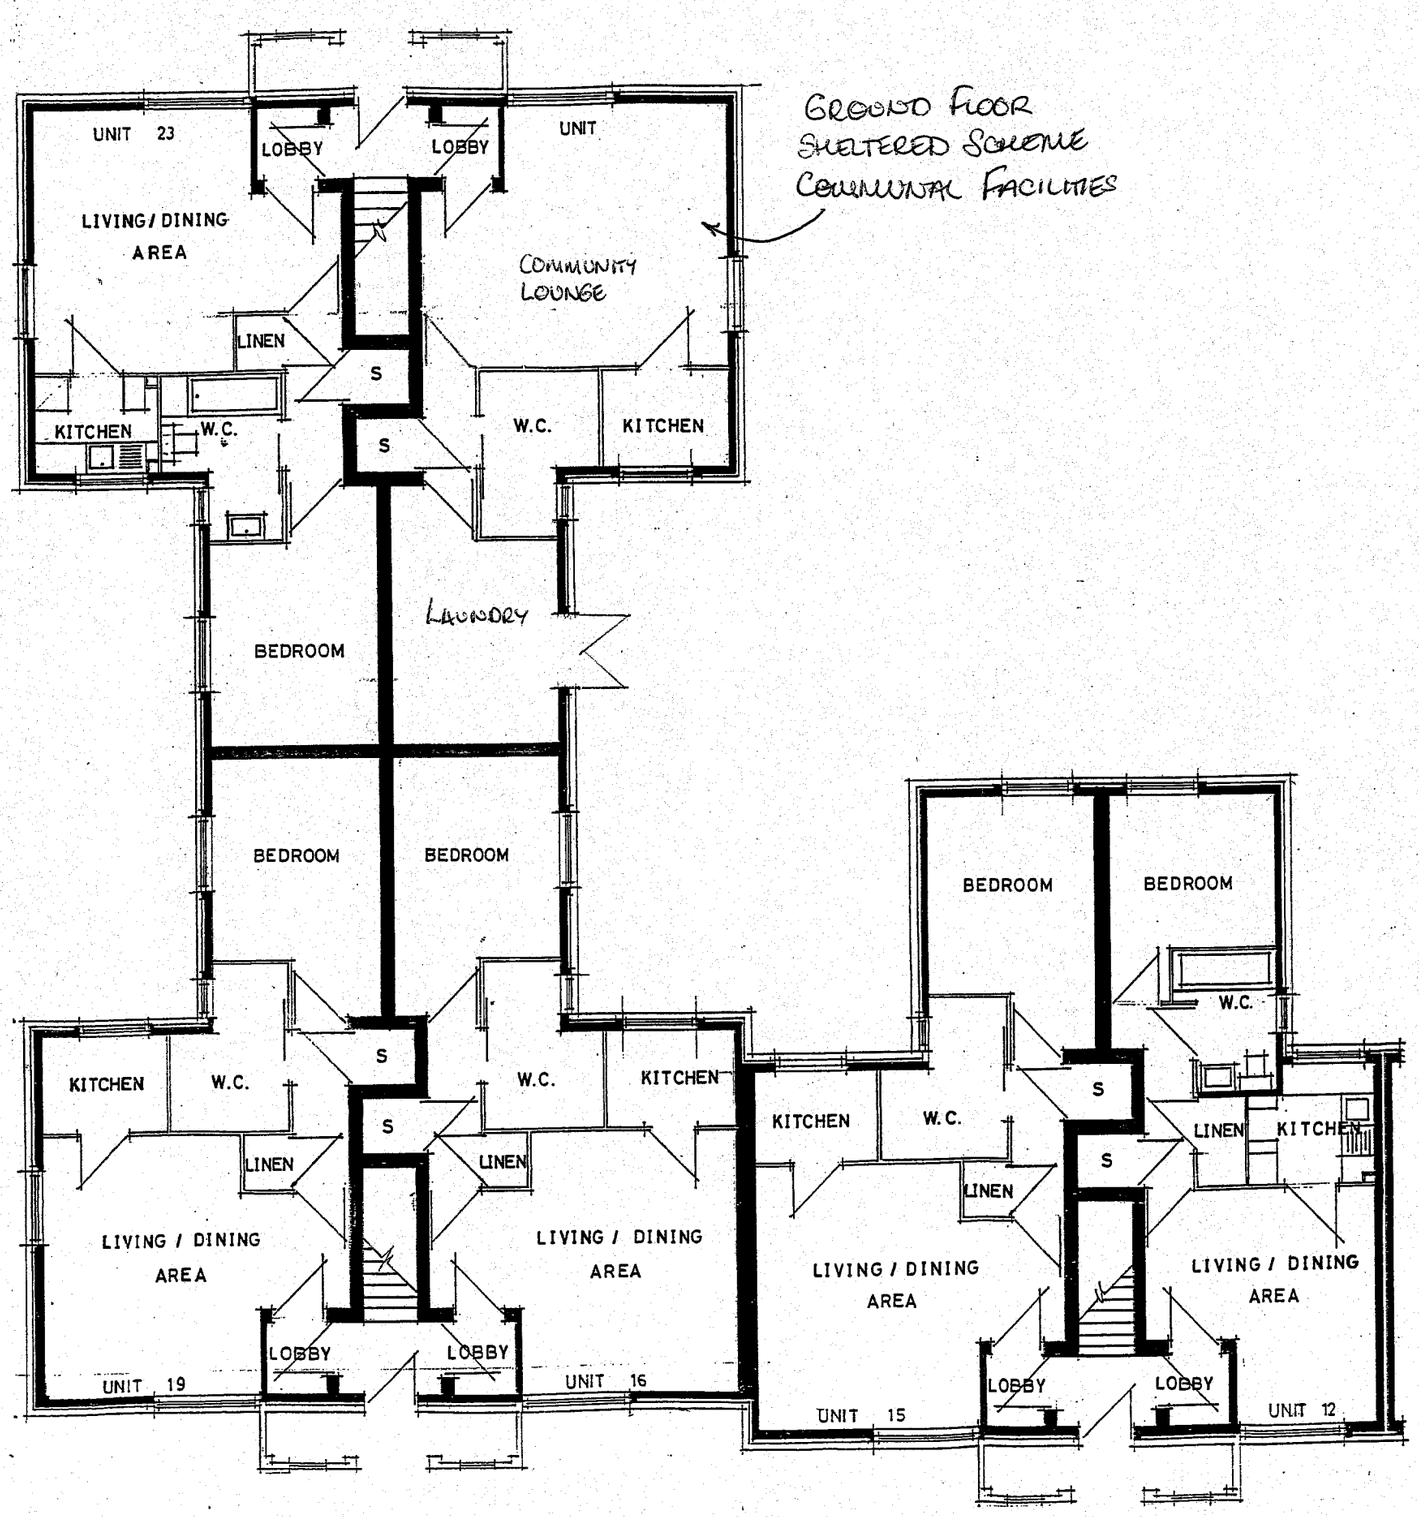

Landscaping

The vegetation along the east elevation consisting a row of bushes will be removed. After the conservatory is built, the existing paving slabs will be reinstated.

Appearance

After through consultation with the council's planning officer and county council's architect on design options compatible for the scheme, a glass conservatory on a dwarf brick wall will provide less impact in the area compared to other designs. The pitch of the glazed roof is maximised to emanate the pitch roofs of the existing building. Glazing is essential to provide as much natural light into the proposed and existing rooms.

Colour of bricks, pvcu window frames and aluminium roof bars are designed to match colours of existing building and glazing components.
