Big Box Storage Centre, Portslade, Planning, Design and Access Statement

Introduction

The purpose of this design statement is to support the Planning application forms and drawings and identify justifications for the proposals. This is an application for a commercial extension to an existing storage building with B8 warehouse use owned by the Big Box Storage Company.
In preparing this planning proposal we have identified the contextual factors which are relevant to the site and the commercial needs for the expansion of the existing business in order to inform the proposal.

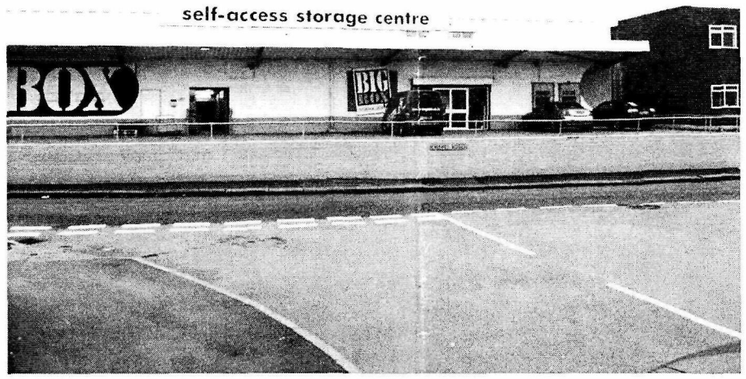

Existing site

The existing site is privately owned land within an industrial/ business use area surrounded by built up residential and has a B8 use class for warehouse storage. The site is around 0.39 hectares and is bordered by roads on three sides to the South, North and West. To the East are commercial buildings adjoining the site with a narrow gap between of around two metres.
The existing building on the site is a large steel framed storage building with access at the front for delivery of storage goods. The building extends the width of the site with a large area for car parking to the front. A public/ staff entrance also exists to the east of the building frontage with a small reception area and office accommodation. The building has an outer brick skin with higher level white profile metal cladding and profile metal roofing.
The storage use for the building is for private consumers rather than commercial warehouse and distribution and therefore the size and frequency of deliveries and vehicles to the site is relatively modest. Details of this are demonstrated in the attached traffic survey, which shows infrequent daily deliveries of mainly cars and small vans with occasional large vans and removal Lorries. There are two loading bays along the front of the building with roller shutter doors.
Access to the site is from Chapel Road to the car park area which currently provides far more parking than the required provision to the site.
The site is within area AE2 and AE4 of the local plan which is designated for use classes B1, B2 and B8.

Proposed extension

The proposed building will be formed by two rectangular extensions from the existing building and will be connected to the existing building internally. A new office area and public reception entrance will be incorporated to the East block extension. There will be recessed loading bays into each extension block to provide a covered area for delivery. The remaining fore court area will provide adequate parking for the staff and customers and a turning area for cars and removal vans.

In response to the context of surrounding buildings the extension projects to the building line of the adjacent buildings to the South and will be similar in height and scale to adjacent buildings.
The surrounding buildings are a mixture of brick and industrial metal cladding. The proposed extension will be clad with modern metal profile composite panels with colour powder coated finish in a dark grey colour.
The building has been designed as a box in form with parapet walls concealing the pitched roofs behind to encapsulate the box storage purpose of the company.
In keeping with the simple form of the building the reception entrance is shown with full height glazing in one complete section. The remaining existing front façade will also be clad in the same panels for continuity and to lift the appearance of the entrance to the building.

The amount of development and scale proposed will be approximately 640 m/sq floor area with a building height of approximately 7.3m above ground level. The layout will be open plan for storage with small areas indicated on the plans for reception, office space and toilet facilities.

The landscaping will be hard landscaping to the access road and parking areas. No soft landscaping is proposed, although some indigenous planting could be introduced to the front of the building and along the road frontage. The boundary wall to the front will include an additional 1.8m steel wire security fence, and steel sliding cantilever gates at the entrance.

Access to the site will be as existing with deliveries for storage at both extensions as shown on the drawings. Staff and customer parking are either side of the main entrance with reception to the east of the parking.
The parking requirement following the proposal will be more than adequate with 10 proposed spaces and 6 required for staff. Space will also be available for cycle and motorcycle parking if required.

We feel that given the minimal level of traffic generated there will be no adverse effect on the local road network in accordance with section AT12 of the local plan. The site is within an area identified in the local plan as suitable for B8 use as specified in section AE4 and is therefore appropriate development necessary for the economic growth of the business. The existing proposal area is currently vacant with low car parking usage and therefore there will be no economic loss resulting from the development and although small, there will be an increase in employment for the site as whole.

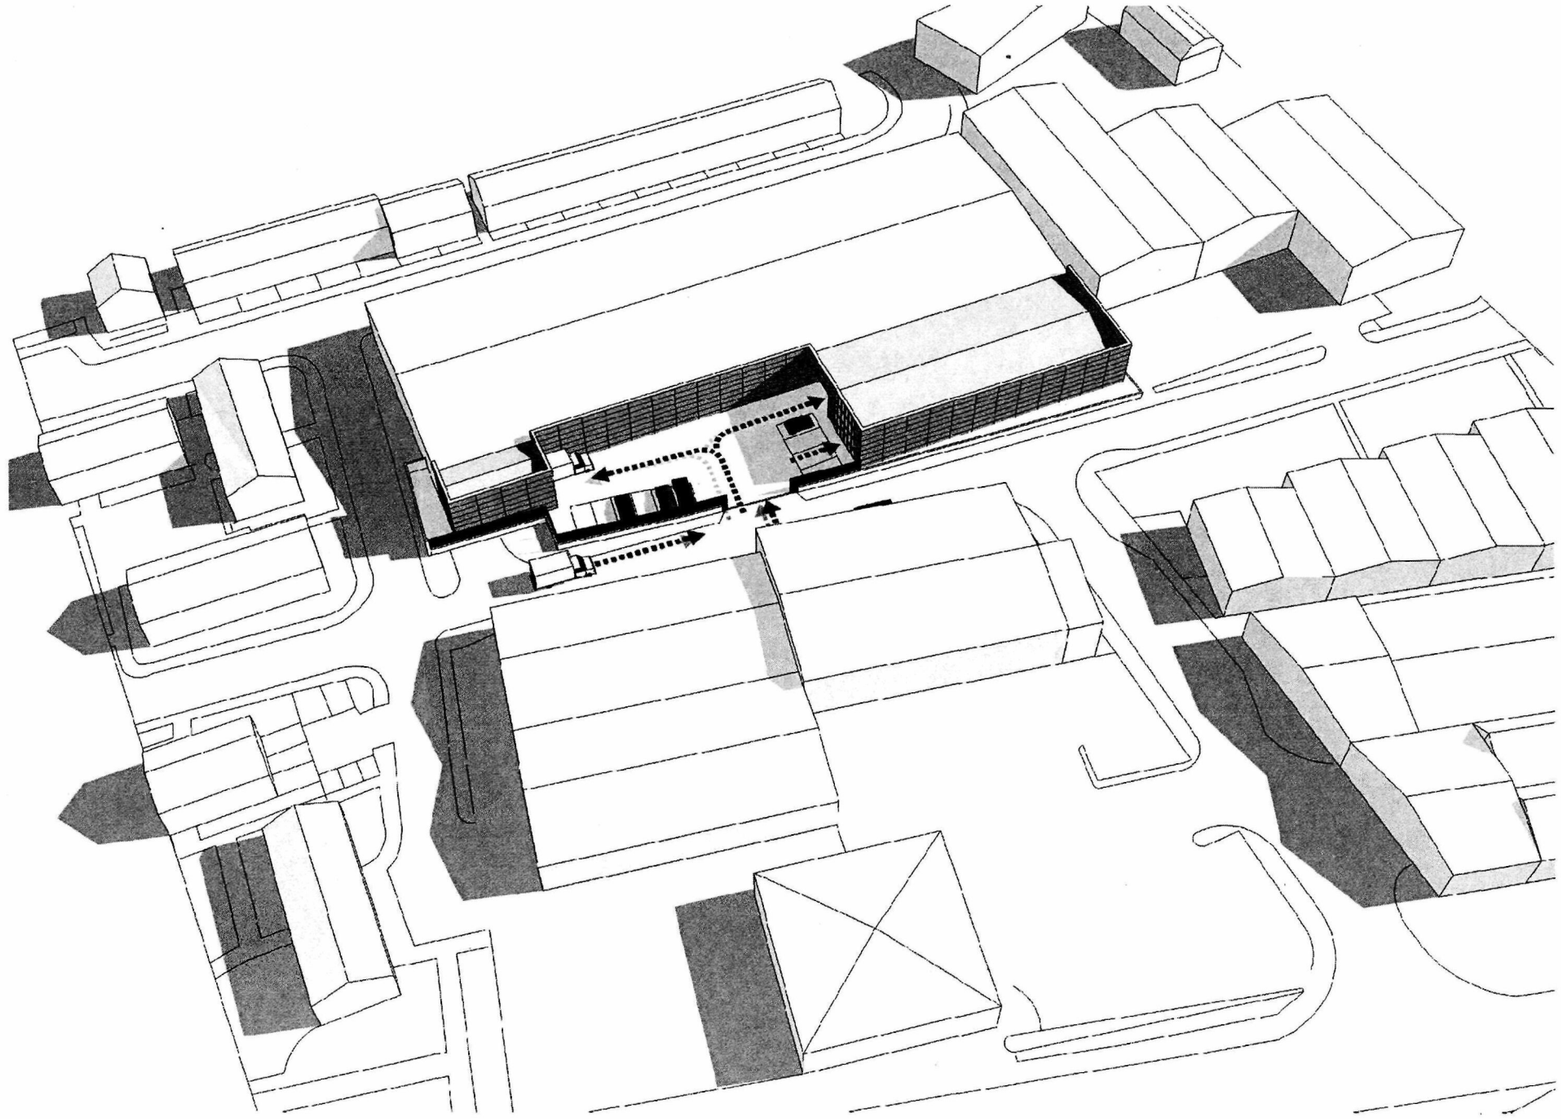

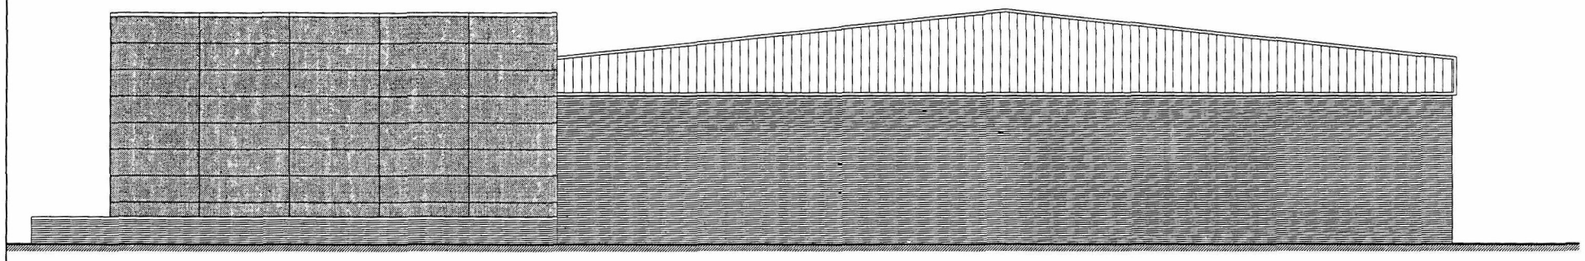

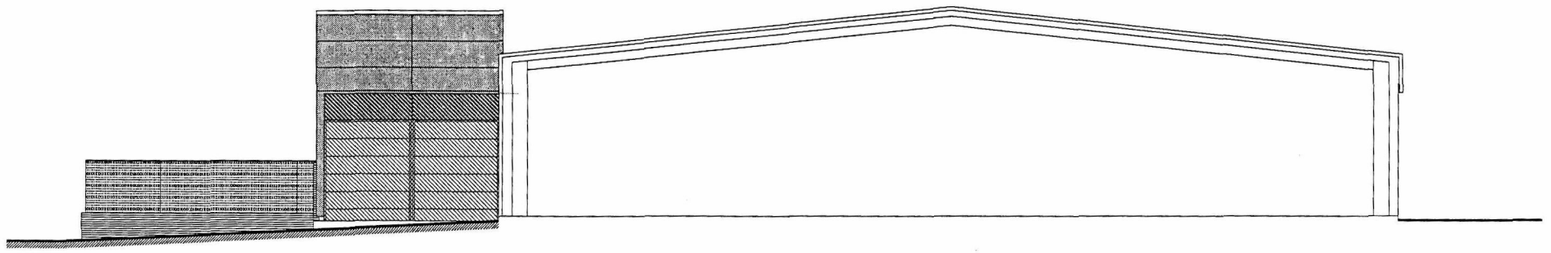

Image showing the scale and context of the proposal. Access to the car park and entrance are indicated in red with delivery access shown in blue.
