Dear All,

On Monday 18th October, we trialled the portable lights at Ham Skate park between 8.00pm and 9.00pm to see if they would be suitable to run evening sessions in the future.

All went very well and so far we have not received any complaints. The Skaters from the user group only were allowed to skate and said it was good and no problems with shadows or blinding spots.

Therefore I have sent in total 3 emails, which this one shows the lights around the bowl and a skater trialling its use. Next shows street course unlit, but with about 20 scooter users hanging around. Final one is from a distance how the lights look.

These are to give you an idea as to how it looks and to ask if you are OK about the user group arranging some evening sessions over the winter?

The original planning permission did include the permission for lighting if money became available.

Yesterday evening and future events is supported by both the Fire service and PCSO's.

Please let me know your comments

Thanks

Clive
