Subject: ref: ADC/0083/10

I write regards the above ref planning application at 44 New Road Shoreham, when I received the planning notice back in April. I submitted online a consideration for the planning application for garage doors as I live on the lower ground level and my bedroom is adjacent to the space to be utilised as a garage. I requested that a quiet garage door mechanism be installed and sound proofing be placed to prevent our sleep disturbance from garage/car doors slamming. It is obvious from the activity next door the application was successful but nowhere can I see that my requests were even taken into consideration or what decision was made.

Can you please advise the outcome of my requests and if they were considered.

Thank you
Sacha
