4. Description of the Proposal

Please describe the proposed single-storey rear extension.

We would like to square off the existing extension.
The proposal shows that the existing garage will be demolished to give space for the new extension.
The eaves height would be the same as the existing (2800 mmH). The roof would therefore be at the same height and would be stretched using the same material (re-use of the existing roof tiles).

The aim is to increase natural lighting into the building and to be able to better the internal layout to accommodate the modern life style of the occupants.

The overall extension is less than the 6m permitted for a semi-ditched house.
The proposed square off extension would be done before the 3oth of May 2019.

Is the property? (tick one only) ☐ (i) Detached ☒ (ii) Other

How far will the proposed extension extend beyond the rear wall of the dwelling measured externally?	3.1	metres
What will be the maximum height of the proposed extension, measured externally from the natural ground level?	3.7	metres
What will be the height at the eaves of the proposed extension, measured externally from the natural ground level?	2.85	metres

Where the enlarged part will be joined to an existing enlargement of the dwellinghouse, please provide the total enlargement (being the enlarged part together with the existing enlargement to which it will be joined) for the following questions:

How far will the total extension extend beyond the rear wall of the original dwelling measured externally?	5.07	metres
What will be the maximum height of the total enlargement, measured externally from the natural ground level?	3.7	metres
What will be the height at the eaves of the total enlargement, measured externally from the natural ground level?	2.85	metres
