Hi Helen,

Please see below confirmation from the Bridge Inn that they are happy with the revised design.

Terry – can you respond back to Imogen regarding the flood gates?

Hopefully this helps?
Can you also provide some answers to the flood gates please.
Thanks

Hi James

Yes the plans for the Bridge are suitable and we have agreed to them

the water tight render and the glass screens are both done

There was talk of flood gates for the 2 access of the garden is this correct ?

Imogen

Dear Imogen and Caitlin

I hope you are both well?

We met last in January year to discuss that an alternative design of the flood defence being set back was agreeable to you of both as it did not impact on the river view from the pub and garden. It was on this basis that we proceeded with a detailed design of a flood render around the pub building. We also agreed to install a glass screen on the riverbank wall as an 'accommodation work'.

In order to discharge a planning condition, please can you both provide confirmation in writing (an email is fine) as soon as possible, to confirm that you are happy with the design that has been proposed. We can then submit this to the planners.

Many thanks
James
