We would recommend that you arrange a site visit with us at your soonest convenience, this visit is free and no obligation. It can be completed in two ways to meet your requirements;

A virtual survey where one of our trained in house designers will discuss the proposal with you via video call.

A physical on site survey to discuss all of your requirements.

Both options allow us to work together to confirm your proposed equipment locations, answer any questions you have and note down any special requirements that your project may have.

## **Pre-Installation Requirements**

What we require from **YOU!**

We require an electrical supply & water supply from you/your contractor. These are usually very simple to install. We will also supply you with the pipework that runs between the automist pump and spray head for you to install.

### **Summary:**

- **Water supply for the Automist pump (Washing machine valve)**
- **Electrical supply for the Automist pump (13amp unswitched fused spur)**
- **Installation of automist first fix hoses**

[Please read the pre-installation document in full. The guide can be downloaded by clicking here!](#)

**If your project is completely finished and you no longer have a builder on site, please let us know and we can may be able to recommend a contractor to you or provide a quote for these works as well!**
