Dear Matthew,

Please find attached drawing CI 03d Proposed Elevation, showing two options for new top hung casement windows:

Metal Windows Option
To match existing metal windows that are to be removed (see photos attached).

Timber Window Option
These will require an additional frame to ensure adequate weatherproofing. This will result in a bulky addition to the windows and will emphasise the difference between these and the original windows.

The client would of course like to use the metal window option, can we present this to the committee with your recommendation?

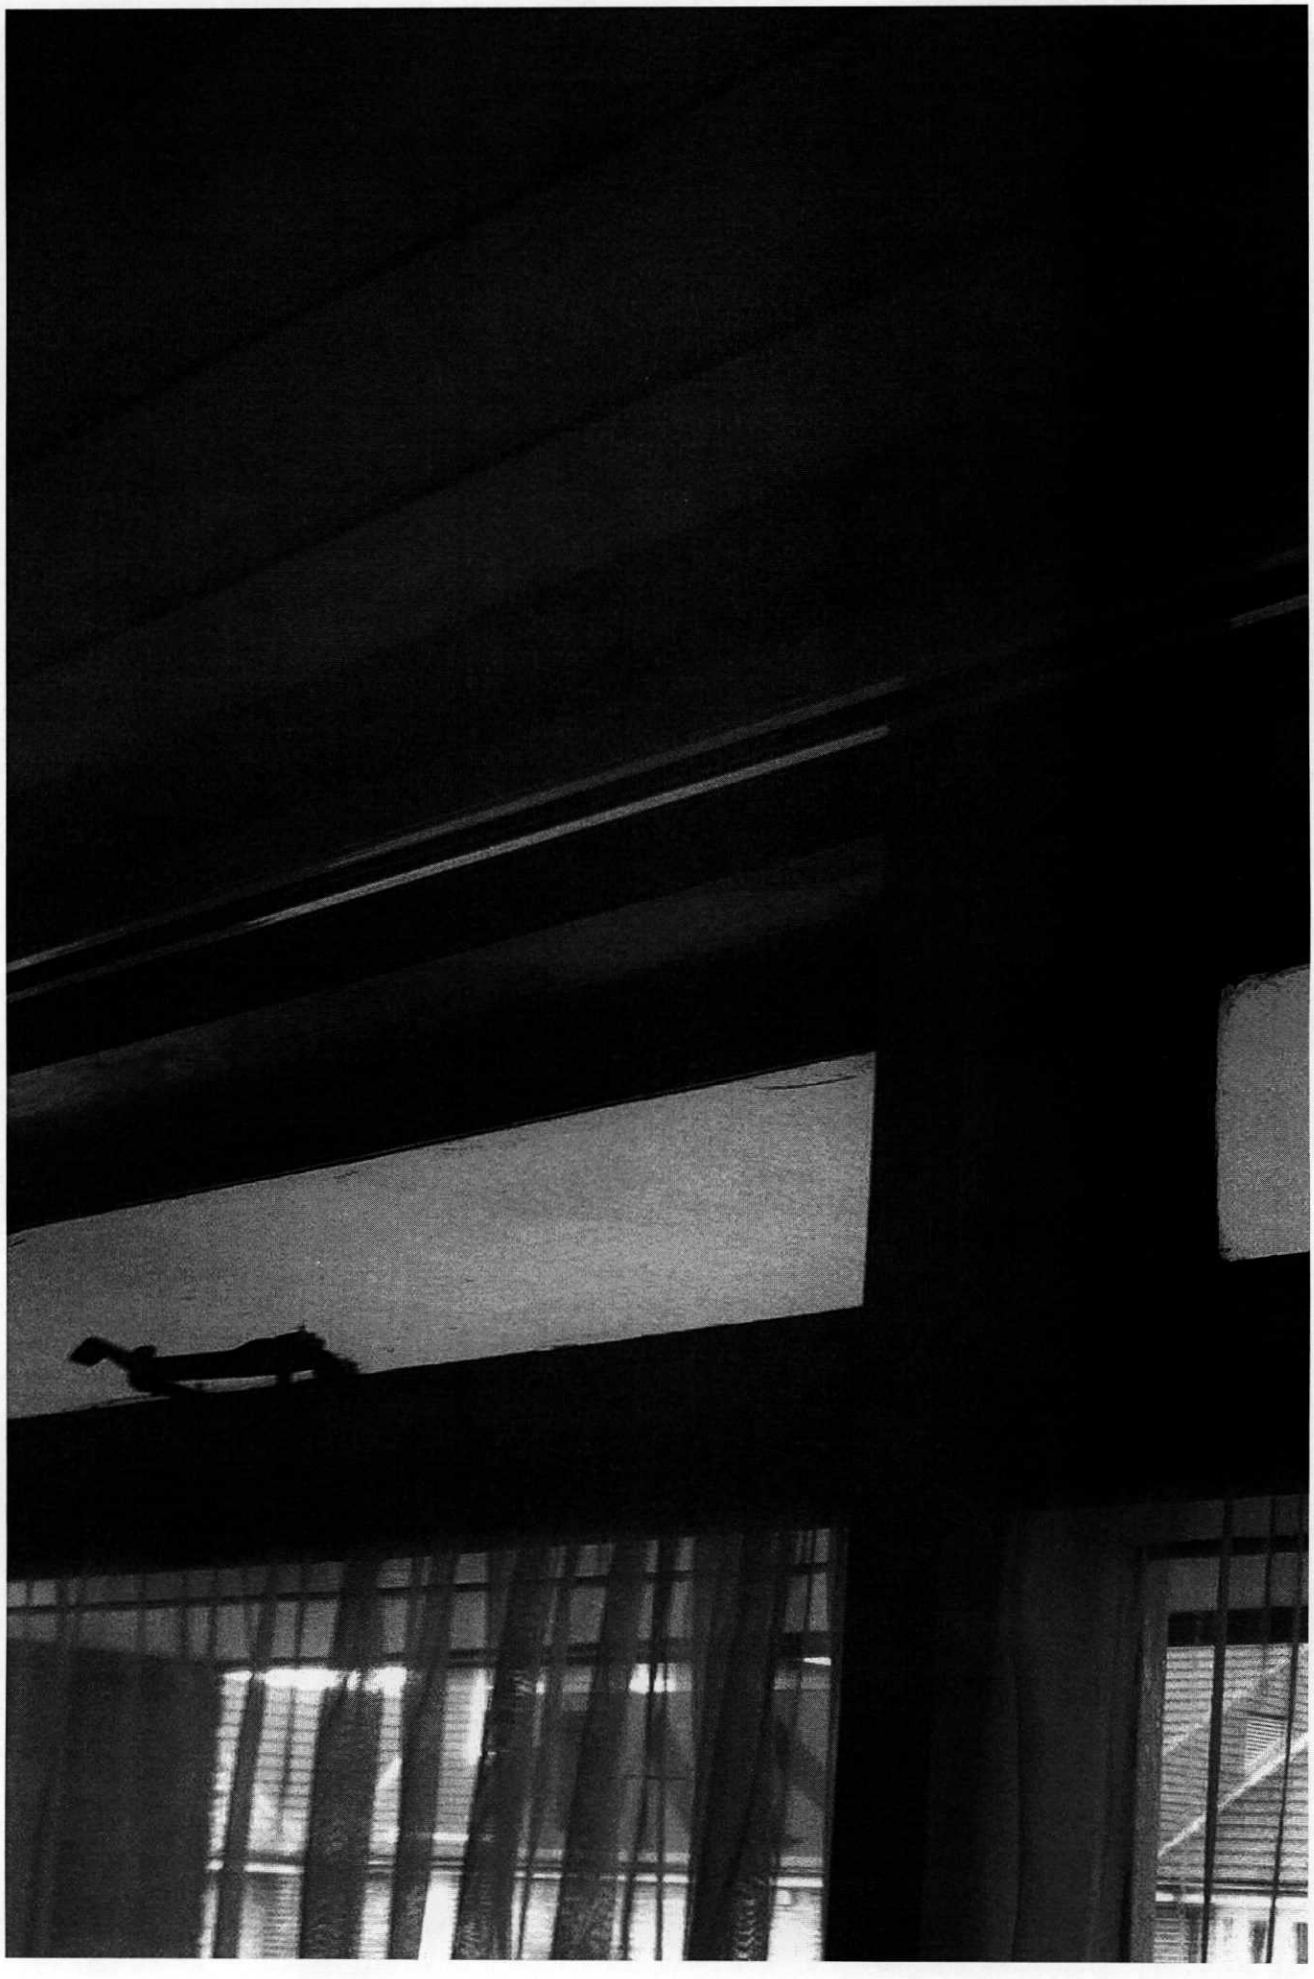

Roof lights
Do you think the committee will possibly object to the rooflights, considering there are condensers and extract units already on the roof? I f so I will submit a design statement for the windows and rooflights.

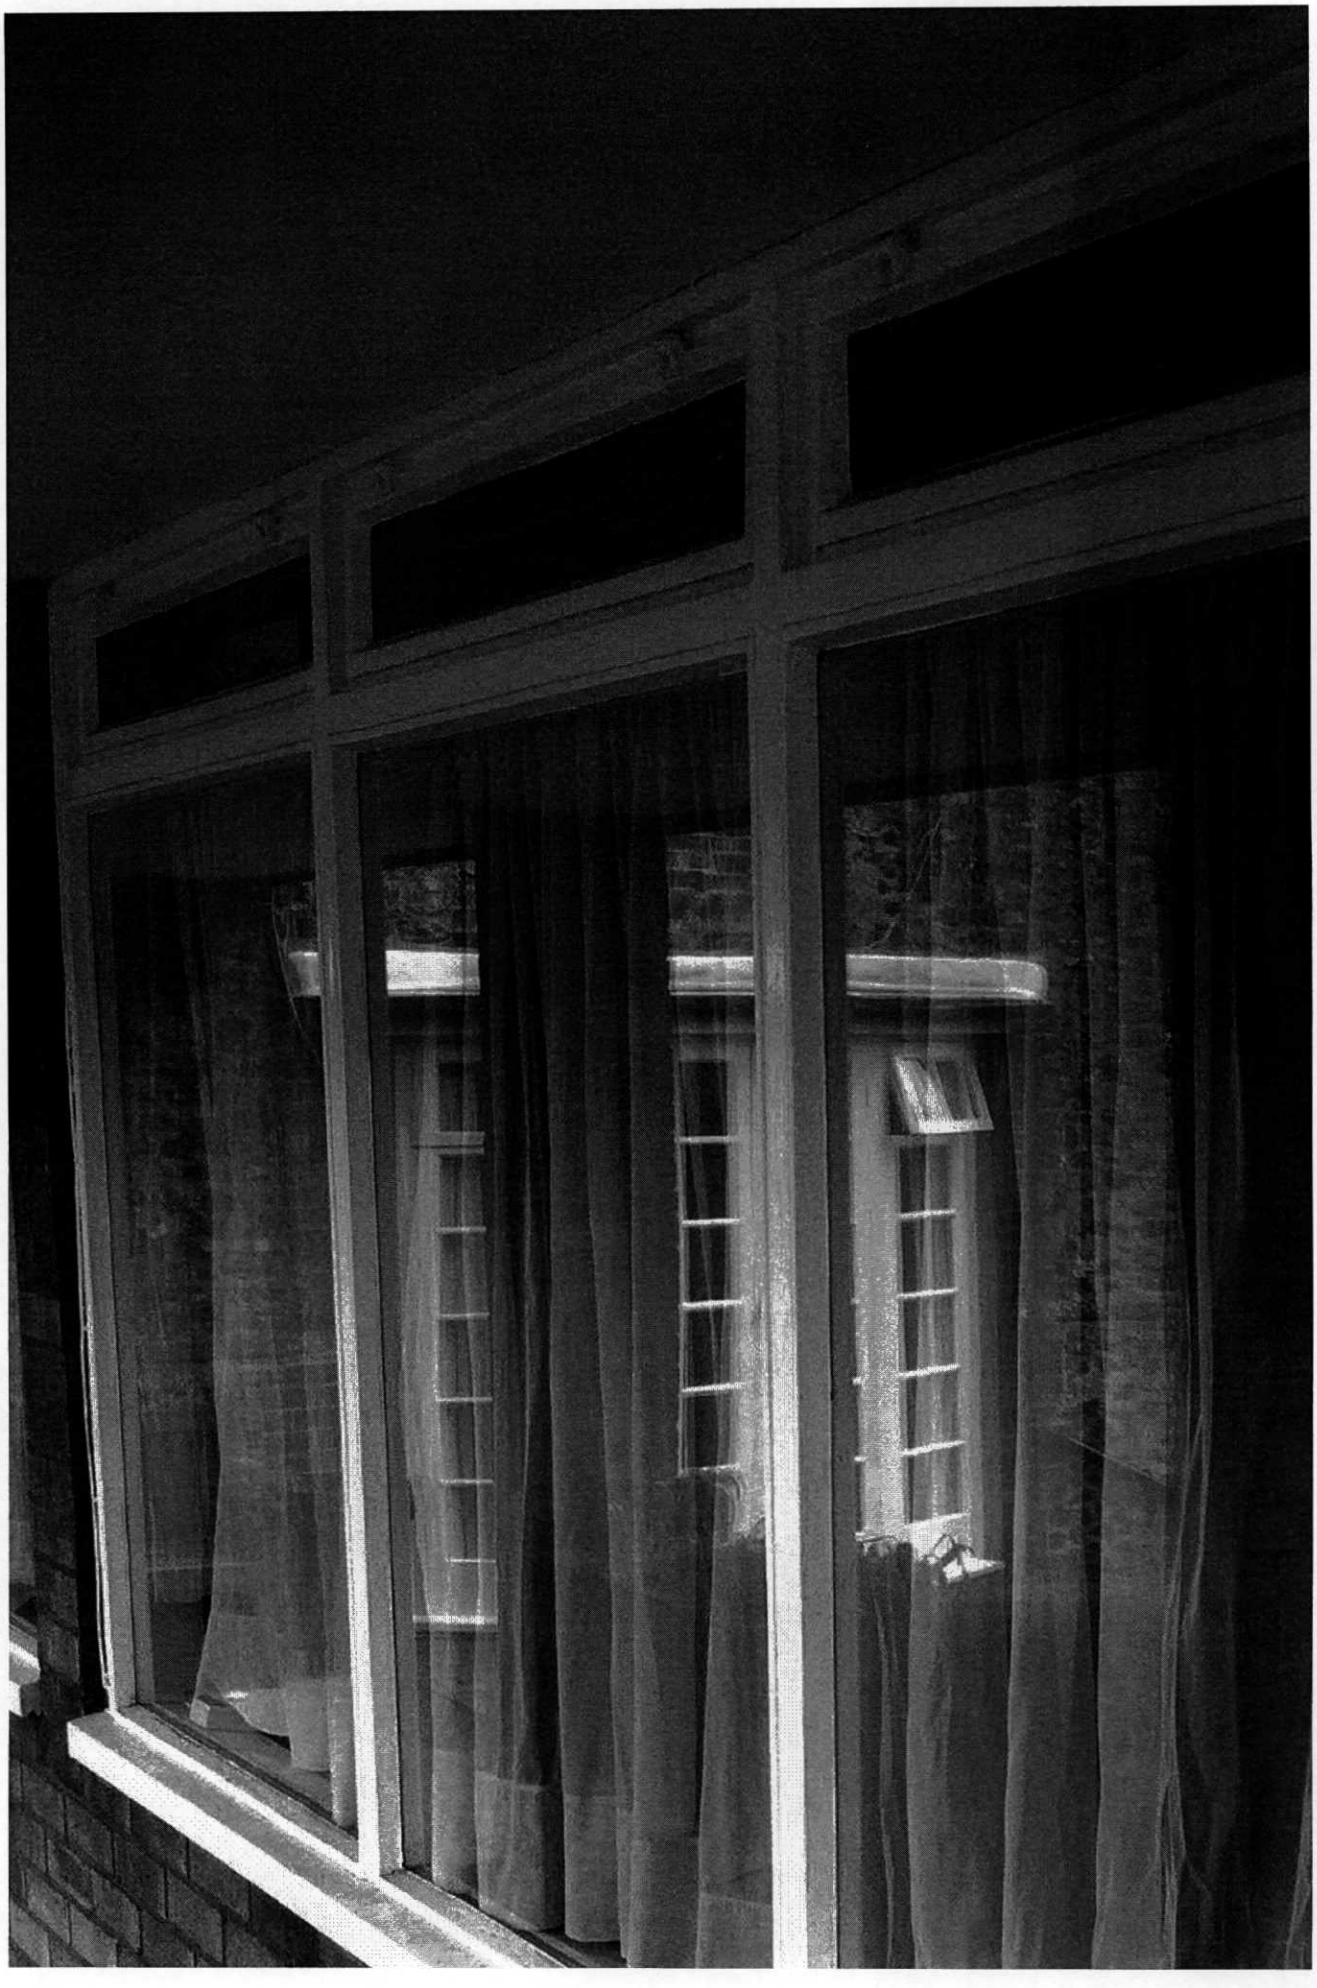

Kind regards

Sarah
