Loss of grassland of more than 100m2 (typically abandoned allotments) which is cut infrequently, or which supports a variety of flowers, particularly on south-facing slopes or along the coastal strip	NO	12	Sunny, open rough grass sites which do not receive regular management often support reptiles, Glow Worm and (on the coast) Hoary Stock. This indicator also detects chalk grassland plant communities.	a
Any of the following observed on the application site: Narrow pathways passing under thick vegetation or fences; small soil excavations, burrows of a diameter greater than 20cm.	NO	13	Badger setts can occur almost anywhere in Brighton and Hove. Even single sett entrances benefit from full protection under the Protection of Badgers Act 1992	a
Ponds of all types (including garden ponds on the application site).	NO	14	Great Crested Newt (the terrestrial habitat may be inside the development site even if its breeding pond is outside it)	a, b
